DETAILED ACTION

Claims 1-60 are pending in this application filed January 16, 2002. Applicant's election dated 8-29-2003 to Group I, claims 1-49 to Restriction Requirement dated 08-13-2003 is acknowledged and hereby expressly made **FINAL**. Claims 50-60 are withdrawn.

Claim Rejections - 35 USC § 103

15.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

16.

Claims 1-49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hayama et al. USP 6,123,933 and Reckitt et al. GB 2 344 997, both cited and supplied by applicant.

Hayama et al disclose hair cosmetic compositions comprising the same film forming water-soluble vinyl amine polymers as claimed by the applicant in the same amounts and proportions. Note columns

2-10. In column 9, lines 60-63 Hayama further discloses that cationic, anionic nonionic and amphoteric surfactants may be employed. In column 12, Hayama further discloses that hydroxycarboxylic acids are employed. In column 13, Hayama also discloses that antimicrobial agents are employed in the referenced composition. Hayama discloses each and every aspect of the invention as claimed by the applicant with the exception of employing iodine or iodophor as an active agent.

Reckitt et al disclose iodine releasing disinfectant solutions. Reckitt further discloses that said agents may be employed for both medical and non-medical use. It would have been obvious to one of ordinary skill in this art at the time the invention was made to have included the iodines of Reckitt into the compositions of Hayama in view of the teachings of Reckitt that iodones have antimicrobial properties and has long been known in the art.
